

Jose Carlos Meza Gonzales

UX/UI DESIGNER | PRODUCT DESIGNER | UX ANALYST

Lima , Perú - mezasalaman@gmail.com - +51 +51 934 865 894- [PORTAFOLIO](#)

Semi-Senior UX/UI Designer with 3+ years of experience creating user-centered digital experiences. Data-driven profile with strong skills in usability, prototyping and information architecture, leveraging analytics tools like Google Analytics, Hotjar and Microsoft Clarity. Experienced using AI-powered design tools such as Stitch AI, Pencil, Figma Make and Figma to accelerate interface ideation, prototyping and design-to-code workflows. Strong collaborator with product, frontend and development teams to deliver scalable, efficient and user-focused solutions.

EXPERIENCIA PROFESIONAL

Grupo HNG

Rol: UX/UI Designer

Lima - Perú

Date: December 2025 – Present

Responsabilidades:

- Led UX Writing strategy and interface copy creation using AI tools such as Gemini, improving clarity, tone and consistency across critical user flows.
- Designed and iterated complex user flows, interfaces and high-fidelity prototypes using Stitch AI and Figma Make, enabling faster validation during strategic and leadership meetings.
- Built and scaled Design Systems, ensuring visual consistency, component reusability and efficient cross-product alignment.
- Performed data-driven user behavior analysis using GA4 (Google Analytics), Mixpanel and Microsoft Clarity, identifying friction points, key events and optimization opportunities.
- Actively contributed to refinement sessions with stakeholders, supporting requirement definition, prioritization and alignment with product goals.
- Collaborated closely with development, QA and technical leads to ensure accurate implementation of design solutions within agile environments.
- Presented prototypes, UX findings and improvement proposals to leadership teams, informing strategic decisions through data and user insights.
- Promoted user-centered design best practices, helping align business, technology and UX standards across digital products.

Geosatelital

Rol: UX/UI Designer

Lima - Perú

Date: June 2024 – October 2025

Responsabilidades:

- Designing digital products with a focus on geolocation and e-commerce platforms for both private sector clients and government entities.
- Creating user stories, process flows, wireframes, and information architecture for diverse web modules and complex platforms.
- Validating and auditing functional requirements, ensuring seamless implementation through close collaboration with development teams and stakeholders.
- Authoring technical manuals and user guides to streamline platform adoption for internal teams and public sector users.
- Leading in-person and virtual training sessions, providing product onboarding for over 50 end-users.
- Evaluating User Experience through user interviews, heuristic evaluations, A/B testing, and data analysis using Hotjar and Google Analytics.
- Collaborating in Agile environments (Scrum), working cross-functionally with Product and Engineering teams.
- Leveraging AI tools (Stitch) to optimize design workflows and interface prototyping.

EXPERIENCIA PROFESIONAL

KusKana

Rol: UX/UI Designer

Remoto

Date: August 2023 – May 2024

Responsabilidades:

- Led the end-to-end redesign of the digital platform, significantly improving accessibility, user experience, and visual coherence.
- Spearheaded functional requirement gathering and user story mapping in direct coordination with stakeholders and development teams.
- Designed and implemented a scalable Design System based on reusable components, ensuring UI consistency and aligning with brand identity.
- Defined user-centered navigation flows and information architecture, optimizing overall platform interaction and usability.
- Developed high-fidelity prototypes in Figma, conducting usability testing and executing iterative improvements based on user feedback.
- Actively participated in Agile sprints (Scrum), prioritizing functional deliverables and driving continuous improvement cycles.
- Served as the strategic bridge between design, business, and engineering, ensuring experience coherence and alignment with the product vision.

Level Tour

Rol: UX/UI Designer

Remoto

Date: January 2023 – July 2023

Responsabilidades:

- Designed end-to-end user flows and experience architecture for a mobile application focused on travel and digital experiences.
- Conducted qualitative and quantitative UX research, including user interviews, surveys, and behavioral analysis to identify product improvement opportunities.
- Facilitated co-creation workshops and work sessions with multidisciplinary teams using Agile dynamics and visual tools (Scrum boards).
- Led the visual and functional redesign of the mobile app, significantly optimizing accessibility, visual hierarchy, and interaction clarity.
- Developed high-fidelity prototypes and comprehensive functional documentation to ensure efficient handoff and technical implementation.
- Collaborated directly with Product and Engineering teams to ensure the seamless translation of design vision into technical solutions.
- Applied iterative design processes, incorporating continuous feedback from users and stakeholders to drive product excellence.

CIBERTEC – Higher Technological Institute

Degree: Graphic Design Technician

Graduation Date: December 2023

Specialization: UX/UI Design and Digital Product Design

Relevant Coursework:

- User Experience (UX) Design: User research, usability testing, flow definition, empathy mapping, and Human-Centered Design (HCD).
- User Interface (UI) Design: High/low-fidelity wireframes, advanced prototyping in Figma, responsive interfaces, accessibility principles, and visual design systems.
- Digital Project Management & Business Planning: Agile methodologies, product validation, collaborative work with cross-functional teams, and early-stage product strategy.
- Programming Fundamentals: Development logic, conditional structures, and introductory HTML/CSS—supporting better collaboration with engineering teams.

Universidad Peruana de Ciencias Aplicadas (UPC) — In Progress

Major: Systems Engineering

Focus: Digital product development, process automation, and strategic vision aligned with Product and Project Management roles.

Relevant Coursework:

- Programming Fundamentals: Logic, loops, functions, and conditional structures.
- Database Systems: Relational modeling, SQL queries, and data structuring.
- IT Product Management: Product planning, agile methodologies, value creation, and roadmap execution.
- Product Analytics: KPI definition, data-driven decision-making, and user-oriented analysis using modern measurement tools.

Certifications

Coursera – Google UX Design Professional Certificate

Completion Date: July 2024

Key Learnings:

- User-Centered Design applied to real digital products.
- Planning, developing, and testing UX solutions end-to-end: from research to high-fidelity prototyping.
- Application of methods such as interviews, surveys, usability tests, A/B testing, and UX metrics.
- Creation of user flows, wireframes, and interactive prototypes in Figma.
- Accessibility, iterative design, and Design Thinking methodologies.
- Strengthened skills in presenting prototypes and communicating design decisions.

Tailwind CSS – 24 Labs

Certificate: Tailwind CSS

Key Learnings:

- Building responsive interfaces using Tailwind CSS for scalable UI development.
- Designing reusable components aligned with atomic design principles.
- Applying best practices in UI implementation: readability, scalability, and maintainability.
- Integration of Tailwind with HTML and foundational knowledge of React workflows.
- Utility-first styling, micro-interactions, and mobile-first design for production-ready UIs.

SKILLS

UX Strategies

User Journey Mapping · User Stories · Competitive Benchmarking · A/B Testing · Heuristic Evaluation · Human-Centered Design (HCD) · Wireframing · High-fidelity Prototyping (Figma) · Persona Development · User Flows · Usability Testing · Heatmap Analysis (Hotjar/Clarity) · Accessibility Standards · Information Architecture · Iterative Design · UX/UI KPIs · Data-Driven Insights & Metrics Analysis

Design Tools

Figma · Adobe XD · Adobe Illustrator · Affinity Suite · Miro · Notion · Canva · Trello · Stitch · Figma Make · Pencil (AI-based prototyping)

(Incluí tus herramientas de IA que mencionaste para que figure como ventaja competitiva.)

Frontend (Basic UI Development)

HTML · CSS · Tailwind CSS · Introductory React (hands-on certification level) · Component-based UI understanding

Work Methodologies

Scrum · Agile · User-Centered Design (UCD) · Design Thinking · Lean UX · Cross-functional collaboration workflows

Additional Skills

Product documentation · Technical writing · UI/UX specifications · Visual communication · Presentation of design solutions · Collaboration with Dev, QA, Product, and Business teams · Requirements refinement and stakeholder alignment
