José Carlos Meza Gonzales

Semi-Senior Product Designer | UX/UI Designer

Lima, Peru | mezasalaman@gmail.com | +51 934 865 894 | LinkedIn | View portfolio

PROFESSIONAL SUMMARY

Semi-senior Product Designer and business strategist specializing in data-driven product design and conversational AI. I have designed end-to-end experiences for e-commerce, telecommunications (Movistar), food delivery, marketplaces and monitoring platforms. I combine UX Research, service design, UX/UI and product analytics (GA4, Clarity, SQL, Python) to make evidence-based decisions tied to business KPIs: I analyzed 850K+ users and redesigned an onboarding after whose launch activation rose from 48% to 63%.

PROFESSIONAL EXPERIENCE

Solera | Integratel (Movistar) | User Experience Analyst / Product Designer

July 2026 - October 2026 | Telecommunications

- **UX owner for the Movistar e-commerce store (Tienda Movistar):** led the optimization of purchase flows, from catalog and device and plan selection to checkout.
- **Research:** conducted cognitive walkthroughs, interviews and heuristic evaluations. The team used these findings to steer key e-commerce decisions; the work was recognized by stakeholders and presented to several areas.
- **Large-scale product analytics:** analyzed the behavior of 850K+ users with GA4 and Clarity (funnels, heatmaps, session recordings) to inform product and business decisions.
- **Conversational design for Mi Movistar:** designed the conversational experience for the payment management module, with flows and responses that guide users.
- Designed information architecture, flows and web and mobile prototypes, including alternative and error scenarios and WCAG criteria. Coordinated with Business, Development, Sales and QA.

Grupo HNG | Data-Driven Product Designer

December 2025 - July 2026 | Lima, Peru

- **Led end-to-end design** of food delivery, logistics and conversational AI platforms, from discovery to post-launch measurement, aligning user needs with business KPIs.
- **FoodDelivery, web platform for food businesses:** led research and redesigned the guided onboarding, from sign-up and email activation to the first store and its menu (categories, products, add-ons, conditional options, related products and discounts). Documented the journey, prototyped it and validated it through usability testing. After launch, activation (merchants publishing their store) rose from 48% to 63%.
- **ConDuzko, used-car e-commerce with conversational AI:** designed the assistant that helps buyers find a vehicle (intent map, dialogue architecture, flows and responses) and validated it through user testing.
- **HNG corporate landing page:** designed and built the company website with Claude Design, from content architecture to a production-ready responsive implementation deployed with GitHub.
- **Service design audits:** evaluated digital flows with journey maps, service blueprints and heuristic evaluation, and prioritized improvements with Product and Business.
- **Research and product analytics:** testing with Maze, Lyssna and Optimal Workshop, and synthesis in Dovetail and FigJam. Tracking with GTM, GA4, Mixpanel and Clarity, dashboards in Looker Studio and Power BI, and A/B tests prioritized with RICE/ICE, reducing friction in food delivery and logistics flows by up to 35%.
- **AI-powered workflow:** integrated Stitch and Claude Design into the process, built accessible (WCAG) Figma components and cut handoff time by up to 40% with development-ready deliverables (React, HTML, Tailwind, JavaScript).

Geosatelital | UX/UI Designer & Service Designer

June 2024 - October 2025 | Lima, Peru

- **Satelock, asset and fleet monitoring platform:** designed the incident-handling journey (alert, asset, location and history, assessment, action and confirmation), centralizing operational context to support prioritization and decision-making.
- **UX Research:** 48+ hours of shadowing with Satelock operators to understand how they detect and handle incidents. For Seller Center, an automotive marketplace app, researched the service booking journey to define the key information for choosing a shop: services, ratings and availability.

- **Research with government entities:** co-designed routes for Lima with public entities, interviewed 50+ people and trained their teams in research.
- **Service design:** mapped the service with service blueprints and stakeholder maps, connecting the customer experience (frontstage) with monitoring, support and customer service (backstage).
- **Product analytics:** analyzed the Geosatelital dashboard with GA4, Clarity and Hotjar, and restructured search flows in real-time monitoring: the time operators needed to locate information after an alert dropped from 7 to 4.5 minutes (–35%).

KusKana | UX/UI Designer
January 2025 - February 2025 | Remote | Independent project, recommended by the Geosatelital CEO

- Designed the research plan and activation strategy for the app, with a guided onboarding for users' first steps.
- Turned interviews, heuristic analysis and insights into prioritized hypotheses, and simplified critical paths and information architecture.
- Advised the stakeholder on business decisions grounded in UX. Validated solutions with prototypes and usability testing under Agile/Scrum.

Level Tour | UX/UI Designer
June 2023 - March 2024 | Remote

- **Large-scale competitive benchmark:** analyzed the market and industry competitors to identify gaps and differentiation opportunities.
- Analyzed mobile journeys to detect friction in critical tasks and redesigned navigation, information architecture and flows.
- Validated hypotheses through moderated testing and user feedback, and collaborated with Product and Development on scalable solutions.

EDUCATION

CIBERTEC | Graphic Interaction Design
Graduated: December 2023

Training in UX Research, interaction design, Behavioral UX, information architecture, design systems, Product Analytics, A/B testing, Agile/Scrum and definition of KPIs, North Star metrics and OKRs.

CERTIFICATIONS

- **Udemy | Digital Analytics: GA4, Looker Studio & Google Tag Manager** | 2026
- **Coursera | Google UX Design Professional Certificate** | July 2024
- **24 Labs | Tailwind CSS Certification** | 2024
- **Udemy | Frontend Development: HTML, CSS, JavaScript, React & Tailwind** | 2023

LANGUAGES

Spanish: Native | **English:** Advanced (C1)

TOOLS & SKILLS

Design & prototyping: Figma (Auto Layout, variables, components), FigJam, design systems, wireframes, high-fidelity prototyping, digital accessibility (WCAG).

UX Research: Maze, Lyssna, Optimal Workshop, Dovetail, Miro, Google Forms, Typeform. Interviews, surveys, card sorting, tree testing, heuristic evaluation, moderated and unmoderated usability testing.

Service design & strategy: Service blueprints, stakeholder maps, journey maps, Jobs To Be Done, user personas, Design Thinking, Double Diamond, RICE/ICE.

Product analytics: GA4, Google Tag Manager, Mixpanel, Hotjar, Microsoft Clarity, Looker Studio, Power BI. Funnels, cohorts, retention, A/B testing.

Data analytics: Python (Pandas) for data analysis; SQL (queries, joins and aggregations); database design and reading (relational modeling).

AI & front-end: Stitch, Claude Design, conversational design, React, HTML, CSS, Tailwind CSS, JavaScript.
